

Multitop RC: the latest evolution of Multitop MAX and Multitop PRO offers compatibility, security, and reliability.

The Multitop range expands with the **new RC version, which can replace all CISA mechanical locks in the Multitop, Multitop PRO, and Multitop MAX** ranges already available and installed in the market.

The new Multitop PRO RC and Multitop MAX RC locks continue to offer the **familiar reliability** – the product line has been on the market for over 20 years – **with a new central casing design** that allows for **backwards compatibility with all previous mechanical models**, making the solution even more efficient.

Beatrice Bergonzini, Locks Platform Lead EMEA Home & Work, explains the evolution of the new locks: *"Building on the two mainstays of all CISA products, namely high security and reliability, we further improved the new locks by adding even greater ease of installation. So, we **redesigned the central casing to replace all existing mechanical models with extreme simplicity**. The process is straightforward and quick because **it doesn't require any additional work on the door and can be carried out directly on site**."*

The other features that make it the ideal solution for front doors, secondary entrance doors, sliding doors, railings, and shutters include a variety of **short and long faceplate versions** that help ensure security in different usage contexts. CISA's patented security features increase **resistance to forced entry and breaking**, particularly on **double-leaf doors**. And lastly, the **smoothness and reliability of operation** is guaranteed by the rack mechanism that counteracts thermal distortion and by solutions that protect the gears from dirt and installation residues. All strictly **Made in Italy**.

The new models will be available from June 2023.

CISA, a brand of Allegion, is one of Europe's leading providers of security and access control systems. Since its foundation in 1926, it plays a primary role in satisfying the security requirements of any type of building with dedicated electro-mechanical solutions, which enable real-time access control and management. Whether it's residential homes or business centers, schools or health and hospitality facilities, safety is our main concern. For more, visit cisa.com
