

## **CISA RS3 S NEW. Keep your key duplications always under control.**

RS3 S NEW is the latest European cylinder by CISA that not only **protects against unauthorized key duplications**, but also allows owners to check the history of requests and to receive a notification if a duplication is made, further increasing the level of security.

The procedure is simple, as Giuseppe Pozzi, Key & Door Systems Platform Leader Allegion, explains: "Each RS3 S NEW cylinder is supplied with an Authenticard, an owner's card that allows **duplication only by an authorized center**. The request must in any case be forwarded to CISA to obtain the necessary confirmation to proceed. The level of security can be further increased by activating the personal card online. **Each duplication request will be saved on the website** for control and **the owner will receive an SMS or e-mail notification for each duplicate key**. In this way it is possible to trace all requests and check all copies produced directly online. "

To activate the procedure, simply go to the dedicated area on the CISA website by entering the required codes and provide your contact details to be notified of each transaction.

In addition to the active security offered by the controlled duplication, RS3 S NEW also **offers high levels of passive security. The key is in fact covered by a patent that makes it extremely difficult to clone**, due to the presence of a built-in mobile element. The key-biting system with radial pins **allows up to 8 billion different combinations**, making it practically impossible to have two identical keys in circulation.

Last but not least, the CISA RS3 S NEW European cylinder is equipped with **special protective features**, including Snap Resistant patented technology, the special dual-material steel core that provides **+ 40% resistance to pulling and tearing**, and guarantees the highest standard of **protection against forced entry attempts by bumping, picking and drilling**.

**With CISA RS3 S NEW, the range of cylinders opens the door to a new concept of protection in which owners play a more active and conscious role in controlling their own security.**

CISA, a brand of Allegion, is one of Europe's leading providers of security and access control systems. Since its foundation in 1926, it plays a primary role in satisfying the security requirements of any type of building with dedicated electro-mechanical solutions, which enable real-time access control and management. Whether it's residential homes or business centers, schools or health and hospitality facilities, safety is our main concern. For more, visit [cisa.com](http://cisa.com)

## **About Allegion**

# News Release
