

**There's no place like home with CISA Multitop MATIC,  
the new locking system for Multitop steel and aluminium doors.**

FAENZA (July 15, 2019)

The latest addition to the Multitop family gets the thumbs up not only for its **maximum level of security** – certified by EMEIA Testing Lab according to standard EN15685 – but also for its **amazing ease of use**. Fully in tune with new smart and easy living trends, Multitop MATIC offers advanced and innovative functionalities.

The main new feature is that you **don't need a key to lock the door**: just shut the door and **the 3 latchbolts and 3 deadbolts will engage automatically**. You will enjoy immediate protection thanks to the six-point self-locking system, the highest grade of security according to European Standard.

**To open the door from the inside, just lower the handle**. You can override this function by key-locking the door. **Door entrance/exit becomes simpler and safer**, saving you time and worries. Gone are the days when you had to ask yourself "Did I lock the front door?".

As well as advancing safety, the fact that the **three latchbolts are always engaged** ensures the smooth insertion and retraction of the latches and the hermetic sealing of the door, **improving sound-proof and thermal insulation, and energy saving**.

And there is more. Thanks to the CISA MOTOR accessory, you can **open the lock from remote without the need for a key**, using whichever system suits your habits better: intercom, keypad, transponder, badge or mobile phone. The motor-driven version also offers a **daytime release function, that allows you to hold the door open at set times** to facilitate entry and exit, when required. Furthermore, an acoustic and visual (optional) signal indicates when the door is open or closed.

Another great advantage of Multitop MATIC is that **it uses the existing profile recesses and strikers used by all Multitop locks**, saving time and installation costs.

The new Multitop MATIC is recommended when you need **an exceptionally safe main entrance door, which also makes life easy** with features such as keyless locking, remote opening and door handle activation/deactivation according to needs. Due to these reasons, Multitop MATIC with CISA MOTOR **is the ideal solution for residential, but also for public and commercial buildings, and offices**. The soon-to-be-released Multitop EXIT version will further expand the range of applications of the system thanks to the anti-panic function, which is suitable for shopping malls, shops and offices.

With Multitop MATIC and EXIT, **CISA raises the bar on innovation and safety systems** and opens new opportunities to everyone looking for smart safety systems for the home, office and leisure buildings.

# News Release

CISA, a brand of Allegion, is one of the main world providers of security and access control systems. Since its foundation in 1926, it plays a primary role in satisfying the security requirements of any type of building with dedicated electro-mechanical solutions, which enable real-time access control and management. Whether it's residential homes or business centers, schools or health and hospitality facilities, safety is our main concern. For more, visit [cisa.com](http://cisa.com)
