

AP3 S Modulo

The first snap resistant modular
cylinder which can be assembled
in less than 60 seconds

AP3 S Modulo

Quick and easy

THE FIRST MODULAR CYLINDER WHICH CAN BE ASSEMBLED IN LESS THAN A MINUTE

Whatever the door thickness and the lock position, AP3 S Modulo will guarantee quick installation thanks to its modular design and preassembled extensions.

TECHNICAL FEATURES

CYLINDER

- 11 pins (6 active, 5 passive) key biting system.
- Brass body with snap core across the cylinder length (except for single cylinders, various and rim version cylinders).
- Brass plugs.
- Self-lubricating DIN sintered steel cam.
- Hardened steel pins and drivers.
- Phosphorous bronze and steel springs.

KEY

- Reversible flat key.
- Nickel-silver made.
- Numerical coding on the head.
- Key thickness 2.9 mm.
- Depth 0.48 mm.
- Compatibility with protective rose.

FINISHES

- Standard sandblasted nickel-plated brass (fin. 12).
- On request: polished brass (fin. 66).

INSTALLATION IN LESS THAN A MINUTE

AP3 S Modulo is ready for use: thanks to its special tested and pre-bitted modules, with keys and Security Card, and to the pre-assembled extensions, AP3 S Modulo is the first modular snap resistant cylinder which can be assembled in less than 60 seconds.

AP3 S Modulo is the ideal solution for quick installation of high security cylinders for residential uses and for the armored door industry. It is also ideally suitable for access management in factories, shopping malls, universities or hospitals - notwithstanding the door thickness.

ON SITE INSTALLATION

AP3 S Modulo is ready to be installed on site, without any need for preliminary site inspections; this will cut installation times and costs.

SOLUTION PARTNER KIT

The CISA service assembly case contains the parts and tools necessary to carry out installation and assembly.

AP3 S Modulo

Uncompromising security

CYLINDER SECURITY

AP3 S Modulo offers consistent breaking and extraction resistance thanks to the snap resistant core ensuring anti-burglary security: +40% more resistant than standard cylinders.

AP3 S Modulo offers the same performance in terms of resistance to external attack as AP3 S, thanks to its patented bi-material steel snap resistant core, also visible when the cylinder is installed in the door.

MAIN FEATURES

- High "bumping" or percussion resistance thanks to the BKP (Bump Key Power) device.
- High burglar resistance: highly effective against wax impression burglary thanks to the BKP device and special spring shape.
- High drill resistance, thanks to the hardened steel key biting system (all the pins, drivers and inserts set out on both sides of the cylinder)

PATENTS

- Key: PCT/EP99/07611.
- Snap resistant System: B02003U000006.
- BKP: PCT/WO 2007/074163 A1.
- Extensions units: registered patent.

AP3 S Modulo

Your business-boosting solution with limited stock impact

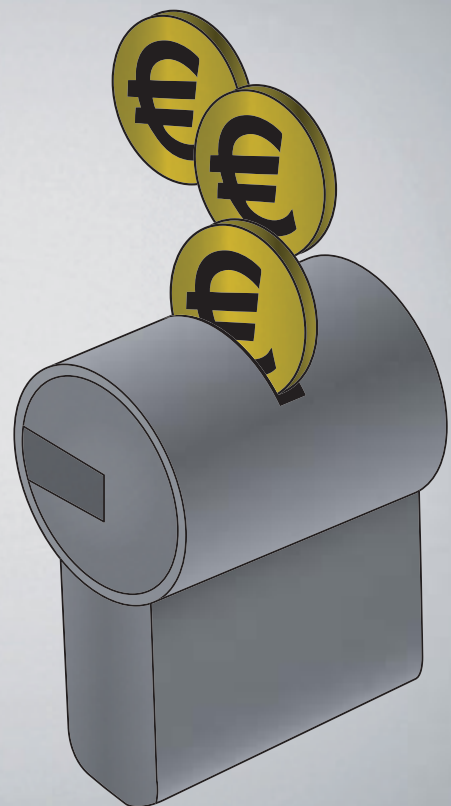

BOOST YOUR BUSINESS, STREAMLINE YOUR STOCK

AP3 S Modulo, thanks to its special configuration, will help you maximize your business opportunities without any extra stock investment, reducing the risk of slow-moving stock-on-hand and improving customer service.

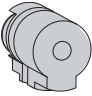

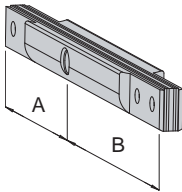

Thanks to its modular configuration, AP3 S Modulo requires an average investment to order 10 cylinders in 5 different sizes at least 20% lower than the investment required to buy AP3 S in the same sizes.

Additionally, in the disassembled version the modular configuration allows extensive, complete service to be provided by the CISA Systems and Duplication Solution Partners terms of both first supply of master-key systems and after-sales service.

Business will be easier than ever with AP3 S Modulo: low investment, great customer service!
