

Cisa eSIGNO Contactless Lock

Innovative Security
Solution for Hotels & Resorts

Seamless 
Contactless 

CISA® eSIGNO

Contactless lock

CISA eSIGNO is the latest addition to our range of security solutions designed for the hospitality industry and community buildings. Its elegant compact design forms the ultimate fusion of technology and ease of use:

- it requires no wiring (it is battery powered) and is easy to install,
- it is ideal when replacing existing systems (with work in progress),
- it meets the needs of all hotels: from large chains to family-run businesses.

Design

CISA eSIGNO combines the most innovative, superior Italian design with advanced security features. Its elegant, compact model meets all mechanical and aesthetic needs, blending in perfectly with the style of every location.

Non-invasive installation

CISA eSIGNO requires no wiring, making it easy to install and to upgrade existing systems. It can be integrated with previously installed CISA contactless locks and electronic cylinders.

Battery powered

Users open the door intuitively, by simply holding the card up to the reader.

This technology eliminates friction and contact, resulting in less wear and tear to parts.

Contactless technology

CISA eSIGNO funziona in modo intuitivo, semplicemente avvicinando la tessera al lettore. Questa tecnologia elimina sfregamento, contatti, quindi l'usura delle componenti.

Do not disturb

CISA eSIGNO is fitted with a LED "Do not disturb" signal advising staff whether guests are present in their rooms

NFC

CISA eSIGNO is compatible with NFC – Near Field Communication technology.

DPR

When combined with a mechanical lock with DPR (Door Position Report) function, CISA eSIGNO offers greater security as it traces and records the door status and any openings with the mechanical override key.

Installation service and training

The installation service is designed for customers looking for "turnkey" solutions. CISA engineers set up the entire system: installation, configuration and training, with maximum professionalism.

Technical assistance

In addition to the standard warranty, CISA offers post-warranty modular service contracts to prevent and correct any issues. A CISA service contract guarantees optimal maintenance of the security system with periodic checkups and rapid emergency response provided when required.
