

## **One partner for security: CISA and SimonsVoss represent Allegion at Sicurezza Milano 2019 with custom-made upgradable solutions.**

Faenza, October 3, 2019. **From November 13 to 15, CISA and SimonsVoss will take part in SICUREZZA Milano 2019.** The two brands of Allegion, a leading global provider of security products and solutions, will showcase **the latest innovations in electro-mechanical and digital solutions for access control in new and existing buildings.**

Visitors to **Hall 10, Stands H32-K31**, will have the chance to experience **interactive paths to security that answer the different needs of operators and consumers in residential and non-residential environments.** The highly innovative technological solutions enable the complete control and easy management of any type of access or gateway, to generate **smart building experiences.**

### **One path to home**

In the residential buildings area, CISA presents **Nuki Smart Lock**, a retrofit access control system that is mounted on existing cylinders and controlled via smartphone, Nuki smart devices and Smart Home voice command. **The integration with Nuki allows keyless entry** all the way from external gates to main doors, and enables to grant access to third parties and open doors with voice command. Another new development showcased in the residential area is the **CISA Multitop MATIC locking device for steel and aluminum doors** that steps up the level of protection and break-in resistance. For automatic and secure keyless locking of the door, simply shut the door.

### **One solution for your business**

In the corporate and commercial buildings area, **SimonsVoss presents digital solutions for integrated and centralized access control, with security levels that can be custom-fit and scaled to satisfy any need.** **The 3060 and SmartIntego locking systems integrate all "locking devices" in one all-inclusive digital solution** that enables users to program and change time-limited access rights, as well as grant free or limited access to restricted areas by means of wireless digital devices (SmartHandle and Electronic locking cylinders) that recognize authorized access holders and register every access. The system also enables online remote opening of locking devices in emergencies.

### **One consultant for healthcare**

In the area dedicated to hospitals and health centers, **CISA presents custom-made and expandable solutions for access control at all times, from day-by-day management** of operator and patient access credentials, to hands-free transit with stretchers and beds, **to emergency management.** In the event of such emergencies, the combination of mechanical devices, electronic solutions and dedicated software enables users to address each phase of the event: from unlocking doors automatically, to checking who is present in the building (thanks to the credentials reader in the assembly points), to using emergency mechanical keys.

## News Release

CISA, a brand of Allegion, is one of the main world providers of security and access control systems. Since its foundation in 1926, it plays a primary role in satisfying the security requirements of any type of building with dedicated electro-mechanical solutions, which enable real-time access control and management. Whether it's residential homes or business centers, schools or health and hospitality facilities, safety is our main concern. For more, visit [cisa.com](http://cisa.com)
