CISA - Designing security and access control solutions for hospitals and healthcare facilities

The strategic brand of Allegion is taking part in EXPOSANITA 2018 – Bologna

Faenza, 11 April 2018

CISA, the leading brand in the design of security solutions for all environments, will be exhibiting at Exposanità – Bologna Fiere from 18 to 20 April in Hall 19 - Stand A45 – in the HOSPITAL area, one of the leading trade shows in Italy in the medical, care and innovation sector.

Fabrizio Galegati, Regional Specification Leader Italy & Spain, underlines “CISA, a member of the Allegion group, designs solutions to make the world a safer place where people live, work and visit. Healthcare facilities are complex structures which often operate 24/7 and safety has to comply with regulations to protect the health of patients, visitors and staff. CISA’s certified solutions protect people and guarantee maximum efficiency when controlling access to sensitive areas. Our team of experts work with security managers, builders and designers on a daily basis, coming up with security projects that meet all needs from A to Z”.

CISA, committed to delivering holistic solutions for vertical markets, especially the healthcare-hospital sector, will be showcasing its latest access control management, master key system and security products at Exposanità 2018. These solutions offer flexible management and control of all accesses (main entrances, perimeter entrances, internal doors, gates,...) and reduce running costs.

With CISA’s master key systems, one key opens all doors: every entrance is managed hierarchically.

This system offers many benefits: access is restricted to authorised persons only, the number of keys needed and the risk of unauthorised duplication are reduced.

Visitors will also be able to try and test CISA eFAST Polaris, the motorised panic exit device with an emergency light system. This product, voted the most innovative solution by visitors to COLFERT EXPO 2017 - Venice, is equipped with a system of LED lights which can be connected to a power supply with back-up batteries and comes on the moment power fails. This solution makes finding the emergency exit a lot easier when visibility is low due to the presence of smoke.

About CISA ©

CISA was established in Florence in 1926, thanks to the insight of Luigi Bucci who invented and patented the first electric lock. CISA joined Allegion in 2013, a global group with a turnover of \$2 billion, of which over \$480 million in the EMEA region (Europe, Middle East, India and Africa) where CISA is located (2016 figures). The success of the Italian brand is confirmed in its numbers: it has registered more than 70 patents over the years, it distributes in 70 countries and has a workforce of over 600 at its headquarters in Faenza (RA) and in the factory in Monsampolo (AP), which produces 26 million keys and 8 million cylinders every year.
